**Price:** \$129.95

### About the Book

This groundbreaking book presents the latest advances in alternatives to animal testing, providing a comprehensive overview of the field. The book is divided into four sections, covering:

- In vitro methods
- In silico methods

- Non-animal models
- Regulatory acceptance

The book features contributions from leading experts in the field, and provides a unique opportunity to learn about the latest developments in alternatives to animal testing. The book is essential reading for anyone interested in this important field.

## **Key Features**

- Comprehensive overview of the field of alternatives to animal testing
- Contributions from leading experts in the field
- Coverage of the latest developments in in vitro, in silico, and non-animal models
- Discussion of the regulatory acceptance of alternatives to animal testing

## **Table of Contents**

### **1. Section 1: In vitro methods**

- Chapter 1: Cell-based assays
- Chapter 2: Tissue-based assays
- Chapter 3: Organ-on-a-chip models

### **• Section 2: In silico methods**

- Chapter 4: Computational toxicology

- Chapter 5: Quantitative structure-activity relationships (QSARs)
- Chapter 6: Machine learning in alternatives to animal testing
- **Section 3: Non-animal models**
  - Chapter 7: Zebrafish models
  - Chapter 8: Drosophila models
  - Chapter 9: C. elegans models
- **Section 4: Regulatory acceptance**
  - Chapter 10: The regulatory landscape for alternatives to animal testing
  - Chapter 11: Case studies in the regulatory acceptance of alternatives to animal testing
  - Chapter 12: The future of alternatives to animal testing

### **Praise for the Book**

"This book is a must-read for anyone interested in the field of alternatives to animal testing. It provides a comprehensive overview of the latest developments in the field, and is essential reading for anyone working in this important area."

**- Dr. Jane Doe, President of the Society for Alternatives to Animal Testing**

"This book is a valuable resource for anyone interested in learning more about alternatives to animal testing. It provides a comprehensive overview of the field, and is written by leading experts in the area."

## - Dr. John Smith, Director of the National Center for Alternatives to Animal Testing
