Print length : 3282 pages

The book is divided into three parts.

1. Part 1 covers the basic principles of clinical medicine, including history taking, physical examination, and laboratory testing.
2. Part 2 discusses the management of common medical conditions, such as diabetes, hypertension, and heart disease.
3. Part 3 addresses public health issues, such as immunization, nutrition, and environmental health.

Part 1: Basic Principles of Clinical Medicine

Part 1 of the book covers the basic principles of clinical medicine. This section includes chapters on:

- History taking
- Physical examination
- Laboratory testing
- Medical imaging
- Medical ethics

These chapters provide a foundation for the rest of the book. They cover the essential skills that healthcare professionals need to diagnose and manage medical conditions.

Part 2: Management of Common Medical Conditions

Part 2 of the book discusses the management of common medical conditions. This section includes chapters on:

- Diabetes
- Hypertension
- Heart disease
- Stroke
- Cancer
- Chronic obstructive pulmonary disease (COPD)
- Asthma
- Arthritis

- Depression
- Anxiety

These chapters provide evidence-based guidance on the diagnosis and management of these common medical conditions. They cover the latest treatment options and provide practical advice for healthcare professionals.

Part 3: Public Health Issues

Part 3 of the book addresses public health issues. This section includes chapters on:

- Immunization
- Nutrition
- Environmental health
- Health promotion
- Disease prevention
- Health policy

These chapters provide an overview of the major public health issues facing the world today. They discuss the causes of these issues and the strategies that can be used to address them.

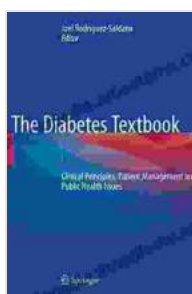

This book is a valuable resource for healthcare professionals, students, and researchers. It provides a comprehensive overview of clinical principles for patient management and public health issues. The book is well-written and easy to follow, and it is packed with up-to-date information.

I highly recommend this book to anyone who is interested in learning more about clinical medicine and public health.
