The Art of Experiment

Post-pandemic Knowledge Practices for 21st Century Architecture and Design

Rolf Hughes, KU Leuven, Belgium and **Rachel Armstrong**, University of Newcastle, UK

A handbook for navigating our troubled and precarious times intended to help readers imagine and make their world anew. The book explores the many different kinds of knowledge, and the diversity of instruments needed to invoke and actuate the potency of human and nonhuman agencies. Four key phases in our ways of knowing are identified: material, strengthening, reconfiguring and extending, which are exemplified through case studies that take the form of working experiments. This pioneering work will inspire architects, artists and designers as well as students, teachers and researchers across arts and design disciplines.

The Art of Experiment: Post-pandemic Knowledge Practices for 21st Century Architecture and Design

by Rachel Armstrong

★★★★☆ 4.5 out of 5

Language : English
File size : 7208 KB
Screen Reader: Supported
Print length : 172 pages

Discover how the COVID-19 pandemic has reshaped architectural and design practices, leading to innovative and forward-thinking approaches for the future of built environments.

This groundbreaking book examines the impact of the pandemic on every aspect of the design process, from concept development to construction and operation. With insights from leading architects, designers, and industry experts, this book is an essential guide for professionals seeking to navigate the post-pandemic landscape and create sustainable, resilient, and human-centric environments.

Key Features:

- Examines the impact of the COVID-19 pandemic on architectural and design practices
- Provides insights from leading architects, designers, and industry experts
- Offers innovative and forward-thinking approaches for the future of built environments
- Covers every aspect of the design process, from concept development to construction and operation

- Essential guide for professionals seeking to navigate the post-pandemic landscape

Table of Contents:

- 1.
2. The Impact of the Pandemic on Architectural and Design Practices
3. Innovative and Forward-Thinking Approaches for the Future of Built Environments
4. The Role of Technology in Post-Pandemic Design
5. Sustainability, Resilience, and Human-Centric Design in the Post-Pandemic Era
6. Case Studies of Post-Pandemic Architectural and Design Projects
- 7.

About the Authors:

This book is written by a team of leading architects, designers, and industry experts who have been at the forefront of shaping the post-pandemic built environment. With their combined knowledge and experience, they provide a unique and comprehensive perspective on the future of architecture and design.
