- Burning or tingling pain in the hands and feet
- Numbness and loss of sensation in the hands and feet
- Increased sensitivity to touch
- Muscle weakness
- Fatigue
- Difficulty sleeping
- Cognitive problems

SFN is often associated with other conditions, such as diabetes, autoimmune disorders, and certain medications. However, in many cases, the cause of SFN is unknown.

There is no cure for SFN, but there are treatments that can help to manage the symptoms. These treatments include:

- Medications to relieve pain and inflammation
- Physical therapy to improve range of motion and strength
- Occupational therapy to help with daily activities
- Alternative therapies, such as acupuncture and massage
