Oswald's Troubled Childhood and Early Life

Lee Harvey Oswald was born in New Orleans, Louisiana, on October 18, 1939. His father passed away two months before his birth, leaving Oswald to be raised by his struggling mother, Marguerite. From an early age, Oswald exhibited signs of emotional instability and behavioral issues.

His mother remarried several times, and Oswald often found himself clashing with his stepfathers. He was expelled from school on multiple occasions for violent outbursts and poor behavior. Oswald's turbulent childhood experiences left a lasting impact on his psyche, fostering a deep sense of isolation and resentment.

Oswald's Marine Career and Political Affiliations

At the age of 17, Oswald dropped out of high school and joined the United States Marine Corps. During his time in the Marines, he became proficient in weaponry and developed a fascination with firearms. However, his disciplinary issues continued, and he was eventually court-martialed and dishonorably discharged.

After his discharge, Oswald traveled to the Soviet Union, where he lived for two years. While in Moscow, he married a Russian woman and had a child. However, his marriage was unhappy, and he returned to the United States in 1962.

Once back in the US, Oswald became increasingly involved in radical left-wing politics. He joined the Fair Play for Cuba Committee and was known for distributing pro-Castro leaflets. Oswald's political beliefs alienated many of his friends and family, and he became increasingly isolated.

Oswald's Fatal Obsession with Marina

In 1963, Oswald met Marina Prusakova, a Russian immigrant living in New Orleans. Marina was a young, attractive, and intelligent woman who shared some of Oswald's radical beliefs. Oswald quickly became infatuated with Marina, and they married within two months of meeting.

While Oswald initially seemed devoted to Marina, his possessive and controlling behavior soon began to emerge. He forbade her from seeing her

friends and family, and he became increasingly jealous of her attention. Marina became trapped in a cycle of abuse and fear, and she eventually realized that Oswald's love had turned into a dangerous obsession.

The Assassination of John F. Kennedy

On November 22, 1963, President John F. Kennedy was assassinated in Dallas, Texas. Oswald was arrested shortly after the shooting and charged with the crime. During his interrogation, Oswald made a series of contradictory statements, and his motives remained unclear.

Two days later, while being transferred to the county jail, Oswald was shot and killed by Jack Ruby, a local nightclub owner. Ruby's motive for killing

Oswald remains a mystery, and many conspiracy theories have emerged regarding his involvement.

The Warren Commission and Continuing Controversy

In the wake of the assassination, the Warren Commission was established to investigate the circumstances surrounding Kennedy's death. The commission concluded that Oswald was the lone gunman and that there was no evidence of a conspiracy.

However, the Warren Commission's findings have been the subject of intense scrutiny and debate over the years. Many researchers and conspiracy theorists believe that there was more to the story than the

official report suggests, and that Oswald may have been part of a larger plot.
