Artificial intelligence (AI) is rapidly transforming the IT services lifecycle, from development and deployment to operations and maintenance. This book provides a comprehensive overview of the latest AI technologies and how they can be used to improve the efficiency, effectiveness, and quality of IT services.

The book is divided into four parts:

* **Part 1: to AI for IT Services** * **Part 2: AI Technologies for IT Service Development and Deployment** * **Part 3: AI Technologies for IT Service Operations and Maintenance** * **Part 4: The Future of AI in IT Services**

Each part provides a detailed overview of the relevant AI technologies and their applications in the IT services lifecycle. The book also includes case

studies and examples from leading organizations that are using AI to transform their IT services.

Key Features

* Comprehensive overview of the latest AI technologies and their applications in the IT services lifecycle * Case studies and examples from leading organizations that are using AI to transform their IT services * Practical advice on how to implement AI technologies in your own organization * Insights from leading experts in the field of AI and IT services

Audience

This book is intended for IT professionals, business leaders, and anyone else who is interested in learning about the latest AI technologies and how they can be used to improve the IT services lifecycle.
